What is

July 2, 1974

Dear Sirs;

DENCO performance has become the most comprehensive development and manufacturing center for Kawasaki triples outside of the Kawasaki factory itself.

Our products and our racing motors have set the racing world on its ear, especially in drag racing. Our expansion chambers have started a design and copy revolution.

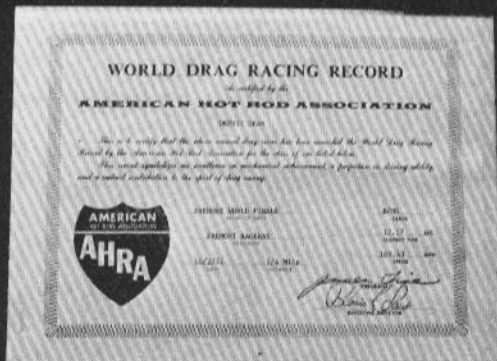

Our products do not go to market until they have proven to be the utmost in quality and durability. When we release a new motor or a new part, it has been in competition and testing for as long as six months. If it is both faster and more durable, it is released. An example is our new "Super Cobra 133" competition motor. During development we broke a lot of parts that were fine with less power. Those parts have been redesigned to the point that this motor is probably the most reliable racing motor you can buy. A side benefit of this and other testing at DENCO is a wide margin of extra strength and durability in our racing parts.

We design and manufacture to a purpose - not a price, therefore, our products are not always the lowest priced, but they are always the best.

Sincerely Yours,

Dennis Dean
Owner

This is

Denco HIGH PERFORMANCE PARTS

DENCO-MIKUNI 34_{MM} G.P. CARBS

- Simple Bolt On Installation
- Uses Stock Cables & Controls
- Vacuum Fitting On Right Carb So Reserve Position On Stock Petcock Is Retained.
- Pre-Calibrated For Kawasaki H2

PART NUMBER

Denco HIGH PERFORMANCE PARTS

CAFE RACER BARS

- .080 Wall Tubing and Heliarc Welding make these the strongest cafe bars On The Market.
- Hydraulic Master Cyclinder Clears Tach On ALL Kawasaki Road Bikes.
- Angle Of Bars Feels Just Right.
- Available In Chrome Or Gunmetal Black.

GUNMETAL BLACK PART NUMBER 08-1

CHROME PART NUMBER 08-2

MAGURA POWER PULL LEVER ASSEMBLY

- Fully Disengages Clutch - Stops Creep
- Easy Pull - A Must With Racing Clutch Springs
- Special Adjuster Fits Kawasaki Clutch Cables.

PART NUMBER 09-1

Denco

HIGH PERFORMANCE PARTS

EXHAUST TUNERS

Simple replacement of stock exhaust baffles with DENCO exhaust tuners gives a large boost in low and mid range power with very little increase in noise. Best performance with a full street bike in a 1/4 mile is 11.2 ET 124.48 M.P.H. Because of the added torque these are great for touring with a 16 tooth counter shaft sprocket. Complete with all mounting hardware and instructions.

72-74 HI & 74 S3 PART NUMBER 02-2
72-74 H2 PART NUMBER 02-1

WELD ON MUFFLERS

- The Same Mufflers Used On DENCO Chambers.
 - Quiet & Extremely Efficient
 - Repackable
- PART NUMBER 02-0

HIGH PERFORMANCE PARTS

DENCO SILENCED EXPANSION CHAMBERS

DENCO chambers work. They work better than others by design not by chance. DENCO chambers are NOT JUST DYNO TUNED, they are COMPETITION PROVEN with world records. DENCO chambers are heliarc welded throughout. Heliarc welding is more than twice as strong, on cones and brackets as gas welding. All DENCO chambers use dual mounting brackets, the strongest mounting possible. ALL DENCO chambers use slip joint and spring mounting flanges for highest vibration isolation and ease of removal for cleaning or polishing.

Our quality standards are THE STANDARD OF THE INDUSTRY. As to fit: a recent article in Motorcyclist Magazine stated, "The chambers all but fall into place." As to quality and finish, Motorcyclist Magazine further stated, "The chromed expansion chambers are WORKS OF ART, but you'll tire of everyone asking, where'd you get those pipes?"

Because of our quadangle design Denco chambers are not limited to just Hi-RPM power gains, Denco chambers have the widest powerband possible.

Imitation is the height of flattery! Other chamber makers are following the Denco design revolution with four cone chambers, however, if it doesn't say Denco it isn't the chamber that has **BROKEN MORE AHRA WORLD RECORDS THAN ALL OTHER BRANDS COMBINED.**

THE DENCO KING COBRA 120 STREET & COMPETITION MOTOR KIT

The original DENCO supermotor and still the strongest motor you can run on the street. THE answer on power for the H2 Cafe Racer. Faster in the 1/4 mile than ANY other street motor.

SPECIFICATIONS

Max H.P.	120 at 9000 RPM
Displacement	800cc
Carburetion	3-DENCO Mikuni 34mm
Heads	Dual Squish Band
Powerband	6,000 to 10,000 R.P.M.
Chambers	DENCO Silenced

PERFORMANCE In Stock Chassis: 10.6 Sec 131+ 1/4 Mile W/Street Tires

KIT INCLUDES

- Porting to 120 HP Specs
- Bore Cyclinders to 800 cc
- Cut Heads (Dual Squish Band)
- 34 mm DENCO Mikuni GP Carbs
- Competition Clutch Spring Set.
- Vinyl Carb Shield
- 800cc Pistons & Rings
- DENCO Silenced Chambers (Black)*
- Lo-Loss Chain & Sprocket Set W/2 Countershaft Sprockets

Send cyclinders (W/intake manifolds) & Heads. PACK CAREFULLY—Damaged parts will BE RETURNED

* Chrome chambers are available. Specify in order either Black or Chrome

THE DENCO SUPER COBRA 133 COMPETITION MOTOR

THE MOST POWERFUL motor for: Pro-Stock Drag Racing, Gas Dragsters, Road Racing or any application using gasoline non-supercharged

SPECIFICATIONS

Max H.P.	133 at 9100 RPM
Displacement	792cc
Carburetion	3-DENCO Mikuni 36mm
Heads	Dual Squish Band
Clutch	15 Plate Wet Ball Bearing Pusher & Rods

POWERBAND 6800 to 10,200 RPM

CHAMBERS: Special racing, welded for stock chassis or kit for custom installation.

PERFORMANCE IN STOCK CHASSIS: 138+MPH 1/4 Mile

PERFORMANCE IN DRAGSTER CHASSIS: 144+MPH 1/4 Mile

All top end parts and labor, outer seals, trans shims, disassembly and assembly (including splitting cases), are included in converting your H2 motor to a Super Cobra 133. Replacement of unserviceable parts extra.

Send complete motorless carbs and manifolds.

CHAMPION SPARK PLUGS

WARMER

L77J

Best all around street plug very good value—Not for racing.

L2G

General purpose street and racing plug. Best racing plug on stock motors and modified motors with point ignition.

L87R

Modified motors with C.D.I. under 100HP. Not for street use.

L55G

Use as street plug on King Cobra 120 Motor-Race plug on King Cobra 120 and Super Cobra 133 in Cold-Damp conditions.

L84R

Best racing plug on super hi output motors. THE racing plug for King Cobra 120 and Super Cobra 133 motors under average conditions. Not for street.

COLDER

L82R

Use in place of L84R in hot-dry weather.
